

# MOBIDIS

## Field Service Management System

### Mobile Dispatching

is a mobile-based service of Masarak. It aids enterprises in utilizing their service teams efficiently through communication with drivers via mobile phone. Drivers are able to check job statuses and respond to job requests.

### Features

- Tailored to suit your business needs.
- Tracking through web portal.
- Pre-defined destinations (single point, geofence).
- Auto-completion of jobs.
- Smart navigation functionalities.
- Various job assignment options
- Drivers can accept or reject the job assigned.
- Notification when rescheduling is needed.
- No hardware required.
- Monitoring reports available.
