

CONNECTED & AUTOMATED VEHICLES

Global & Local Expertise

QMIC has implemented and demonstrated the first MENA standard-compliant connected vehicles platform in Qatar back in 2014. The same platform has successfully participated to the multiple ETSI's Plugtests events in Europe.

Qatar has made significant progress in this area and we plan to take this to the next level. We have been working on the preparation of a large scale pilot that will be deployed in Qatar to test the technology and related applications.

Taking it to the Next Level

Your Local Partner to Realize Connected & Automated Vehicles

Qatar Large Scale CAV Pilot

QMIC has been working on the preparation of the local large scale pilot to test and validate the connected and automated vehicles technologies and application.

Below is a selection of the applications that have been shortlisted to be implemented and deployed in the pilot:

Road Work
Warning

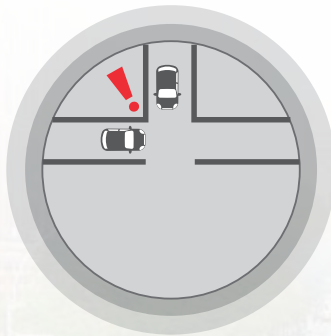

Approaching
Emergency Vehicle

In-vehicle
speed limits

Broken down
vehicle

Intersection
Collision Avoidance

Green Light
Optimal Speed
Advisory

Roadmap to Early Deployment

Qatar has made significant progress in this area and we plan to take this to the next level.

Q2 2018 – Complete
the Extensive pilot and
Usability

Q3 2017 – Large-Scale
Pilot System Ready

2019 - Early
Deployment
